OpenAir Enterprise Edition is the premier professional services automation (PSA) application for global enterprise organizations searching for a solution that can support their around-the-clock business needs.

OpenAir Enterprise Edition is complete. Recognized as the Best Business Software Solution in 2008 by the Software & Information Industry Association (SIIA), OpenAir Enterprise Edition provides comprehensive functionality to streamline every aspect of your global enterprise.

OpenAir Enterprise Edition is effortless. OpenAir Enterprise Edition can be deployed around the world without expensive and cumbersome on-site servers. As a hosted, on-demand solution, OpenAir is accessible at any time from any Internet connection as well as from select handheld devices. Your resources in the field will always have access to the mission-critical information they need.

OpenAir Enterprise Edition is adaptable. Firmly entrench the system within your infrastructure through powerful integrations, and preserve your investment in other applications. By streamlining your processes, you provide managers and executives with visibility across the organization which supports better business decisions.

Why OpenAir Enterprise Edition?

Reduce Your Total Cost of Ownership (TCO)

Traditional client-server applications require exorbitant up-front costs and rigid functionality. As a hosted application, OpenAir Enterprise Edition requires no maintenance or hardware upkeep, so your total cost of ownership is greatly reduced.

Guarantee Success

Fantastic functionality without the proper guidance and support solves nothing. With OpenAir Enterprise Edition, you get 24/7 customer support and a dedicated client manager as well as highly experienced services consultants who provide the platform for an efficient and successful implementation.

Streamline Your Organization

Unlimited integration points between OpenAir Enterprise Edition and your existing business applications enable automated data exchange and optimized processes. Streamline your entire project lifecycle with both front-end and back-end integrations to your customer relationship management (CRM) and general ledger (G/L) applications. By connecting every aspect of your business, you provide increased visibility for your sales and project management teams as well as create streamlined invoicing and accounting for your finance department.
